

SAC Meeting, Tuesday November 2nd, 2021.

Sebastian Middle School

Attendees: Marilee Churchill, Tracy Clauson, Kirstie Gabaldon, Jacob Salmond,

Meeting started at 2:09pm by Marilee Churchill.

Principal's Update: Big thing right now is looking at data and gaps with students that are in subgroups and students who are not. Reading plus competition has 3 categories – lots of kids tying – which means we have a good number of kids participating. Students get prizes for the 3 different categories. Tutoring launched – this cycle is English. Next cycle will be math. 4 week cycles. Not many students are attending. We will look at data after the next cycle to see if it is helping close the gaps.

Red Ribbon week was a success. The surfboards will be displayed and up on the website this week.

The stem board advisory had their first meeting and we have maintained relationships with some local companies. Might be going to Leonard's and Metal factory for field trip opportunities. May be able to tour one of the new school sites and investigate the reality of architecture and engineering through our business partners.

Thank you to Mr. Salmond for coming on Friday to help hand out icecream.

Meeting over at 2:18pm.
